Role: Sole Developer	

Yahoo Finance App (TV)		JavaScript
Yahoo Finance app shows the latest stock quote updates for the users portfolio. User can customize his stock symbols and has options to see chart and other information and news relevant to the symbols.		
Role: Developer		
Widgets Automation Framework and Reporting tool		JavaScript / XML / PHP / Perl / YUI
This is an automation framework / reporting tool completely developed by me to make QA life easier. Test cases written in JavaScript are passed to Widget Engine using Perl script and results are saved as xml files. At the end of perl file execution, it calls a PHP file which sends graphical report to all developers and managers. They can go through the detailed report and also can see earlier execution reports using dashboard. Has features like neat tabular test case execution report, graphical report in email etc		
Role: Idea, Planning and Development		
Yahoo! Widgets		JavaScript / XML / Flash
Developed API scripts in JavaScript, using all the attributes and methods of the API. Also developed flash widgets to connect flash with Widgets using Adobe API. These widgets were used for manual testing of Yahoo! Desktop Widgets on Windows and Mac.		
Role: Planning and Development		
Web Service Testing Framework		Flex / Perl / XML / PHP
Created a PHP Automation Framework using Web Tester for testing Widget Gallery Web Service. PHP Script will pass the selected test suite XML to web tester and once web tester finishes execution, will parse the HTML result and display on screen as well as via email.		
Role: Development		
IndustryPage Video Site	PHP / JavaScript / CSS / Flash / Video Conversion(FFMPEG) / MYSQL	
Industriypage is an artist promotion website. The key features are Video, audio, image uploading and sharing. Users can also sell videos and audios. Website will get commission on each sale. FFMPEG is used to convert the uploaded movie to flash playable FLV format.		
Role: Team Lead		
TheUnionShop		PHP / JavaScript / CSS / MYSQL

Union Shop is a shopping cart site which is feature rich. Admin has lot of options like adding stores, store owners, products into stores, categorizing products, integrating with different available payment gateways, changing between shipping methods etc.		
Role: Team Lead		
DCPPortal.com™ CMS Product		PHP / JavaScript / CSS / MYSQL
It is a content management system. DCP Portal is highly customizable and easy to install. Modules can be added using admin interface without affecting the existing website. It was built on Smart Templates. Some of the modules are CMS, banner management, news, announcements, events calendar, headlines, tips of the day etc. The site supports different languages and can be managed from admin side. DCP Portal has a high user rating in hotscripts.com.		
Role: Team Member		
Autoloyalty™ CRM Product		PHP / JavaScript / CSS / MYSQL
It's a web application software for online customer survey. The survey module done is unique in the field which contains tools to carry out customer survey. Includes modules like newsletter, survey creator, bulk mailer, reports etc. Includes a user friendly installer and a master control panel to keep track of installation. It's developed with template management.		
Role: Team Member		
123BidBuy.com™ Auction Product		PHP / JavaScript / CSS / MYSQL
It is an Auction site, developed as a product. Contains basic bidding work flow along with advanced options for watching an auction, setting AutoBid etc. Registered users can buy and sell their products. Selling is by putting the product into auction. The user who bids with highest amount wins the bid. Admin Controls the whole site.		
Role: Team Member		
AviationContacts.com CMS Portal		PHP / JavaScript / CSS / MYSQL
It is portal for the Aviation Industry. It contains sections like airport search, aircraft search, airline search, aviation event search, aviation classifieds, aviation newsletters, aviation tools, option poll etc and lots more. The portal supports different types of paid members with different levels of access. The sites administration is handled by a number of administrative uses with different levels of accesses. Site also contains an intelligent banner management system which has graphical display of hits, views etc.		
Role: Developer		
JobSearchHub.com		PHP / JavaScript / CSS / MYSQL

It's a full fledged jobs portal. The resume building tool in the site is number one compared to its competitors. It has provision for advanced resume search for jobseekers and job search for employers, with ability to save search and schedule search results through mail. Employers can purchase packages for posting jobs and searching resumes. Admin has full control over packages and managing orders from employers. Admin can also search for employers and jobseekers.
